

VOICE AND ASPIRE LABORATORY Lessons Learnt

Edward Livant BSMT MPH

MTN Laboratory Center

University of Pittsburgh Medical Center

Magee Womens Research Institute

LC Oversight

- We can always do a better job and need to work towards improving
- We need input from trial sites
- We need to talk with other DAIDS LC's to make things as standard we can when appropriate

Communications

- Needs to be frequent and clear between LC and sites
- Needs to be frequent and clear between site labs and clinics

HIV Rapid tests

- ❑ Not so simple as you think
- ❑ Require frequent oversight
- ❑ HIV diagnosis is difficult
- ❑ FDA ≠ better test

Specimen Management

- ❑ Don't change LDMS reconciliations mid study
- ❑ Don't get behind on LDMS reconciliations
- ❑ Track sample shipments very carefully

SSP Manual

- Needs to be reviewed carefully to avoid errors and typos
- Needs careful thought into the correct amount of detail
