

pSMILE/LFG

Estelle Piwovar-Manning

May 23, 2007

MTN regional meeting, Capetown
SA

A stylized silhouette of a mountain range in shades of teal, located at the bottom right of the slide.

pSMILE

- ◆ Reviews CAP panels once a month per site. Week depends on the staff assigned to the site.
- ◆ Will send an email detailing the attached documents, which will include CAP booklet, Graded Responses, and CA if applicable.
- ◆ Email goes to site contacts, DAIDS, and applicable NL representatives

Currently

- ◆ Corrective Actions – are needed for any analyte that fails, any shifts, trends or bias.
- ◆ Corrective Actions – need to be submitted within 30 days back to pSMILE

Requested Revised

- ◆ CA – to be sent to site for completion when analyte is unsuccessful <79%. Internal Review needed for 80 – 99%. Kept on site unless requested by NL.

LFG proposal

- ◆ Cross Network Lab Managers and Lab PI groups formed last year.
- ◆ AACTG, HPTN, HVTN, IMPAACT and MTN leadership decided to refocus the group – Lab Focus Group.
- ◆ One Network contact for each site.
- ◆ Network contact responsible for communication with site.

- ◆ Gives sites 1 person to deal with.
- ◆ NL contact will answer, seek answers, refer questions appropriately.
- ◆ NL contact will review their sites CAP panels on a weekly basis.
- ◆ NL contact will let the site know there is a problem and to start working on the QA.

- ◆ NL Contact will post the reviews on a common portal for the other networks to review. No one else will have access.
- ◆ CA still need to be completed. NL contact should review CA form before submission for completeness.
